

USE-CASE-DIAGRAMM

USER-INTERFACE-DIAGRAMM

AKTIVITAETSDIAGRAMM

Karten ausgeben

for-Schleife
 $i=0, i \leq n, i++$

let color:string = random
let digit:number = random

create HTMLDivElement

appendChild

setAttribute(color=color)

setAttribute(digit=digit)

new Card(color, digit)

push Card to userCards[]

Für PC genau
das gleiche,
nur ganz unten
statt push to
userCards[],
push Card to pcCards[]
